Infrastructure

Infrastructure

Charlie has considerable experience of providing advice and representation in relation to large-scale infrastructure projects in a range of legal contexts, both within the UK and internationally, including the development consent order ('DCO') process, Parliamentary proceedings, environmental regulation and other regulatory issues, contractual disputes, project finance and public procurement. He has particular experience of infrastructure work in the transport, energy and natural resources sectors.

The breadth of his practice means he is unusually well placed to assist clients over the lifetime of their project, from environmental and planning consenting, to public procurement, regulatory and project finance issues, to commercial disputes arising during or after the construction of the project.

His experience includes being integrally involved in proceedings relating to arguably the three most significant infrastructure projects in the UK in recent years: High Speed 2 ('HS2'), the proposed 3rd runway and associated expansion at London Heathrow Airport, and the North-South Ireland Electricity Interconnector. He has also acted in litigation in Northern Ireland in 2022-23 concerning the three most significant recent infrastructure projects in that jurisdiction: the aforementioned Interconnector, Casement Park stadium, and the Arc21 Energy from Waste project.

He is regularly ranked in Planning Magazine's annual *Planning Law Survey* as one of the top silks at the Bar of England & Wales practising in the field of infrastructure planning.

In 2024 he was appointed by the Prime Minister to undertake a review into planning and delivery of national infrastructure projects: see [\(Lord\) Banner KC to lead review on national infrastructure – GOV.UK \(www.gov.uk\)](#). Its recommendations were taken forward by the Planning and Infrastructure Act 2025 and in updates to the Civil Procedure Rules, as well as being relied upon in the Nuclear Regulatory Taskforce's Nuclear Regulatory Review in November 2025. He regularly speaks on infrastructure-related matters in the House of Lords, including in the recent debate concerning the National Networks National Policy Statement.

He is a member of the UK National Infrastructure Planning Association.

Significant infrastructure work includes the following:

Planning

Charlie was voted the No 1 planning KC in Great Britain in the 2025 edition of Planning Magazine's annual *Planning Legal Survey* (in which in both 2024 and 2025 he was the only silk to feature in the three specialist tables of leading silks for residential, commercial & retail and infrastructure planning work). He is the only barrister ever to have been ranked over the progression of their career as No.1 in all three of the Under 35, Juniors and Silks categories of the *Planning Legal Survey*. He is also ranked in Band 1 of leading planning KCs in *Chambers UK Bar 2026* and as one of the leading planning KCs in *Legal 500 UK Bar 2026*. Prior to taking silk, he was unanimously rated as the No.1 planning junior in all three publications. Commentary in the directories includes: "a real jewel in the planning Bar crown", "tremendously respected", "a match for any silk" and "one of the best court advocates I've seen".

His practice covers the full range of advisory, inquiry and High Court work in the planning field. He has acted in many of the most significant planning court cases and inquiries over the last 15 years, including the Supreme Court appeals in *Hillside* (on the relationship between multiple planning permissions for development on the same site), *Sainsbury's Supermarkets* (on material considerations in planning and CPO decision-making), *HS2* (on EIA and SEA) and *CG Fry* (on nutrient neutrality, the Habitats Regulations, and the range of material considerations at the discharge of conditions stage). In *CG Fry*, he achieved a famous victory for the Appellant before the Supreme Court in 2025, winning their appeal in the face of three unanimous adverse decisions below over a period of over 3 years: in the Court of Appeal in 2024, in the High Court in 2023, and before a Planning Inspector in 2022 – a vindication of his strategic vision, resilience and perseverance in the most difficult litigation.

Charlie has unrivalled appellate court experience across the Planning Bar, having appeared in a total of 19 Supreme Court appeals, and dozens of cases before the Court of Appeal. He is often brought in to lead cases that have failed at earlier stages, typically working with the previously instructed team to explore new angles for arguing the case. For example, in December 2025, having been brought in to challenge a high profile decision of an Inspector (following an inquiry in which he did not appear) concerning the definition of "Grey Belt" in the December 2024 National Planning Policy Framework, the effect of which was significantly to limit the amount of land that could be Grey Belt, his submissions led to the Secretary of State and the Local Planning Authority to consent to judgment (*Boscabel Lane, Bishop's Wood, South Staffordshire / AC-2025-LON-004572 Boningdale Homes Ltd v. SSHCLG & South Staffordshire DC*).

In 2025, he acted for the successful appellants in all 13 of the inquiry and hearing planning appeals in which he appeared.

He has worked on a range of different high profile matters with a number of the leading architects in the UK and globally, including Foster & Partners, Ian Ritchie CBE RA, Niáll McLaughlin MBE RA, Elsie Owusu OBE RA and Francis Terry – from urban regeneration schemes to tall buildings, to commissions by private and institutional clients, to policy initiatives.

A member of the House of Lords since March 2024, he is the Co-Chair (with Danny Beales MP) of the Policy Liaison Group on Housing Market and Housing Delivery. In February 2024, he was appointed by the Prime Minister to undertake an Independent Review of Legal Challenges to Nationally Significant Infrastructure Projects: see [\(Lord\) Banner KC to lead review on national infrastructure – GOV.UK \(www.gov.uk\)](#). The Banner Review's report was published in October 2024 ([\(Lord\) Banner KC review](#)

[proposes roadmap to speed up delivery of national infrastructure - GOV.UK](#)). Its recommendations were taken forward by the Planning and Infrastructure Act 2025 and in updates to the Civil Procedure Rules, as well as being relied upon in the Nuclear Regulatory Taskforce's Nuclear Regulatory Review in November 2025. He participated in all the House of Lords debates concerning the Planning and Infrastructure Act 2025, the provisions of which include various concessions and amendments that he secured during those debates. He regularly speaks on infrastructure-related matters in the House of Lords, including in the recent debate concerning the National Networks National Policy Statement.

He is the creator and co-presenter of the high profile cross-chambers planning themed weekly discussion show, '[Have We Got Planning News For You](#)', featuring guest appearances from some of the UK's most well known figures in planning, architecture and government and was nominated for 'Best Use of Social Media' at the Legal Cheek Awards 2021. As of December 2025, HWGPNFY has over 300,000 views and is the leading podcast relating to planning and the built environment, recent guests including the current Planning and Housing Minister Matthew Pennycook MP.

He sits part-time as an Appeals Inspector in the Judicial Greffe in Jersey, Channel Islands, hearing planning appeals in that jurisdiction.

Having held non-executive roles with developers (SAV Group, 2022-2026; Arora Group 2026-present) and having undertaken a modest level of development and land promotion work himself, he understands the practicalities and commercialities of development projects to a degree that most lawyers are not fortunate enough to benefit from.

Regularly commended in the legal directories for his personable and approachable manner, and for the energy with which he commits himself to each client's cause, he relishes the team-work that is central to planning practice. He is just at home cross-examining on complex technical issues at an inquiry as he is making submissions on difficult legal issues in the High Court and appellate courts, or providing strategic advice as a part of a multi-disciplinary team.

His planning practice is international. He has worked on various planning matters in Hong Kong, where he spent a 3 month secondment with Mayer Brown JSM's planning litigation team in 2008, and has acted in relation to planning related disputes in the Bahamas, Montserrat and Gibraltar. For his planning-related work in Northern Ireland, please see the separate 'Northern Ireland' sub-page.

Listed below are examples of his most significant work arranged sector-by-sector in the following order: (1) Major urban development; (2) residential; (3) specialist older persons' accommodation (4) commercial, industrial, retail and regeneration; (5) sports, tourism and leisure; (6) private client work; (7) enforcement; (8) heritage assets; (9) Green Belt development; (10) Planning procedure and practice. Public Procurement

Charlie has substantial experience of both advisory and contentious public procurement work in both England & Wales and Northern Ireland. He is recommended as a leading KC in public procurement by *Legal 500 UK Bar 2026* (having been recommended in a succession of previous editions), which comments that he “*clearly absorbs masses of information and identifies concisely the main points*” and has “*excellent commercial awareness.*” He is also ranked as a Global Leader and National Leader in Projects & Procurement and Government Contracts by Lexology (formerly Who’s Who Legal) 2025. Who’s Who Legal 2024 commented that he “*excels in the government contracts arena for his expert handling of development agreements and regeneration projects*” and “*is singled out by peers as “an excellent all-rounder”.*” He is an active member of the Procurement Lawyers’ Association, a contributor to Keating Chambers’ forthcoming book on public procurement law, and was a keynote speaker at the White Paper Public Procurement Law Conference 2025, discussing exclusion of suppliers for poor performance under the Procurement Act 2023.

Much of his public procurement work has been in the context of regeneration projects and development agreements. This has included the two leading cases on the circumstances in which such agreements trigger the need for procurement: most recently, he acted for the successful appellant in the ground-breaking case of ***R (Faraday Development Limited) v. West Berkshire Council*** [2019] P.T.S.R. 1346 in which, in addition to holding that a development agreement structured around an option to purchase the land in question was a public works contract requiring procurement, the Court of Appeal made the first ever declaration of ineffectiveness by an English court as well as imposing a civil financial penalty; prior to that, he acted for the successful defendant authority in ***R (Midlands Co-Operative) v. Birmingham City Council*** [2012] Eu L.R. 640 (defending a challenge to a development agreement for a retail-led regeneration scheme in Stirchley). He has advised on similar issues in the contexts of (amongst other things) the expansion of a world famous football stadium, the relocation of a municipal sports facility, retail-led regeneration proposals, and the construction of extensions to a well known London Underground station (project costs in excess of £100m). He has also lectured and published extensively on this subject, including an influential article cited in Prof. Sue Arrowsmith’s leading book *Law of Public and Utilities Procurement*.

His practice also includes procurement issues more broadly. His experience includes:

- Advising on public procurement issues relating to a £900m public transport contract (2025).

Arc 21*** [2023] NIKB 86 – acting for the defendant in litigation in the Northern Ireland High Court concerning a challenge to the award of a contract to Regen Waste Ltd for the provision of services for the haulage, treatment, recovery and disposal of Belfast’s municipal waste. Successfully resisted an application for an interim injunction (the contract having been entered into without a standstill period pursuant to the Dynamic Purchasing System Procedure) in June 2023.
